Optimal transport.

The supplied STAHLWILLE tool trolley 13217 is the professional companion for aircraft maintenance and enables optimal transport of the tool sets. Made of durable polypropylene, it is resistant to Skydrol, acetone, petrol and hydraulic oils. With removable drawers, telescopic handles and a padlock, this trolley is equipped for any situation and protects the tool from unauthorised access.

Organisation and overview.

The modular tool insert system creates order and overview. The high-quality and durable foam inserts are chemically resistant and have precise cut-outs for each individual tool. The striking yellow underside of the TCS insert serves as a signal surface. This enables the completeness of the set to be checked quickly and reliably.

Safe and gentle.

Our QuickRelease tool is specifically adapted to the requirements of the aviation industry. The recessed release button in all extensions and universal joints ensures a secure hold and gentle screwing process on sensitive materials, even in the engine areas.

Special tools for aviation.

The set contains high-quality, common HPQ® tools that have been expertly assembled specifically for aviation maintenance. They are FOD safe and offer the tightest manufacturing tolerances, high force transmission and enormous resistance. Equipped with the patented QuickRelease locking system, the tool set sets new standards in terms of quality and reliability.

Bit box for aviation.

Technologies and features.

High Performance Quality (HPQ®)

Our HPQ® tool is made of wear-resistant high-performance steel, yet is thin-walled and lightweight. It withstands high torques and is ideal for work in confined spaces such as turbines.

Foreign Object Damage

STAHLWILLE protects against FOD (Foreign Object Damage). Our tool is ideal for safety-relevant sectors such as aviation, thanks to the screwless design.

Tool Control System

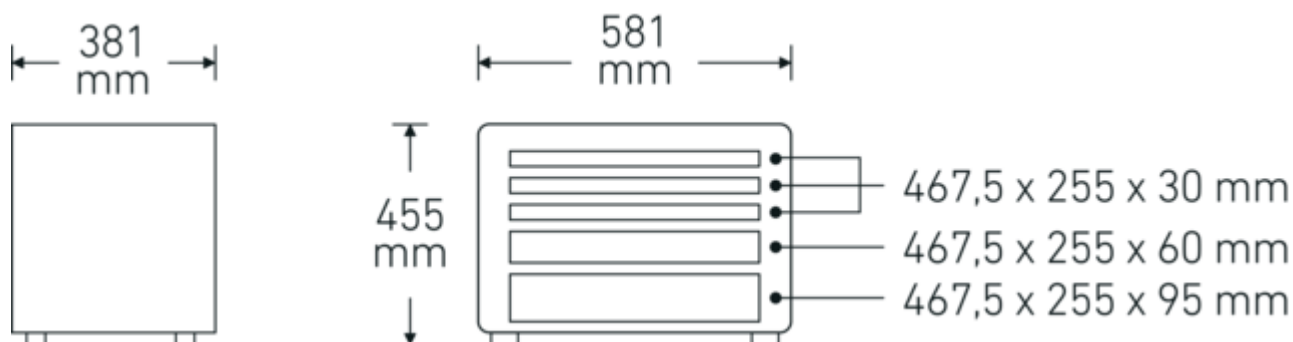

The intelligent modular insert system protects and organizes the tools in tool boxes, workshop trolleys and workshop benches. Two-color foam inlays make checking the completeness of the tools quick and easy.

QuickRelease

The QuickRelease safety lock prevents unintentional loss of insert tools. These click securely into place and are only released again at the push of a button for a quick tool change.
