

## Mechanical loaders unit to 1000 N·m

### Manutork® 7792

Product no.	52110092
GTIN	4018754155446
Model	7792

**Label.** Mechanical loaders unit to 1000 N·m

- Features.**
- **Measures without shifting the point of application of force**
  - By means of a special force transmission system, the mechanical calibration system No. 7792 prevents the point of force application from shifting during the calibration process
  - The lever mounted below the test rail is moved linearly by a spindle and is driven by the handwheel
  - The linear motion is transformed into a rotational motion which influences the transducer
  - The torque wrench to be calibrated remains in its position throughout the calibration
  - This prevents measurement errors resulting from a shift in the point of force application
  - The torque wrench is automatically aligned horizontally by means of a low-friction ball bushing
  - An additional ball bushing ensures friction-free positioning of the torque wrench
  - The resulting reduction in the transverse forces on the transducer and the friction on the torque wrench assembly reduces measurement errors

## Advantages.

Measurement without shifting the point of application of force.

### Technical Attributes.

Width mm (b)	722 mm
Functional length (LF) max. mm	1390 mm
for transducers	sizes 20; 100; 300

### Logistics data.
