

## Combination ratcheting spanner set OPEN RATCH, inch, offset, in roll-up tool pouch

### OPEN RATCH 17a

Product no. **96411709**  
GTIN **4018754345311**  
Model **OPEN RATCH 17a/5**

#### Label.

Combination ratcheting spanner set OPEN RATCH 17a/5 1/4-9/16" 5 pcs.

#### Features.

- inch width across flats
- ring side 15° angled, jaw position 15°
- 72 teeth, working angle 5°
- uncomplicated change of direction by switching on the ring
- reinforced connection between jaw and shank
- sturdy, slim and lightweight design
- high bending strength due to double T-profile
- grip, skin-friendly surface
- extremely resilient, exceptionally durable
- die-forged, hardened and cooled in an oil bath
- chrome alloy steel, chrome-plated
- robust roll-up pouch with hook-and-loop fastener made of polyester
- net inserts allow visibility of the inserted tool
- secure protection of the tool with minimum space requirement

## Advantages.

High-quality combination ratcheting spanner set with inch spanner sizes.

The ring side has an angled design with double hexagon, the jaw position of 15° makes it possible to work even in hard-to-reach places.

The practical roll-up tool pouch is a neat storage solution for tool cases and tool boxes.

The ratchet with 72 teeth allows a working angle of only 5° - for efficient working even in the tightest spaces.

The distinctive STAHLWILLE round finish gives the ratchet ring spanner a non-slip and pleasant feel for safe working, even with oil-smearred hands.

## Product highlights.

### Field-tested configuration.

Our ratcheting combination spanner set contains the most common spanner sizes with inch dimensions and therefore covers a wide range of possible applications. The jaw opening is inclined by 15°, which means that it lies precisely against the screws and therefore guarantees optimum power transmission. The integrated fine-tooth ratchet enables screws to be tightened quickly and efficiently without having to remove the spanner.

### Excellent workmanship.

Our spanners are made from high-quality forged chrome alloy steel, giving them outstanding robustness and durability, even in continuous and prolonged use. They also have a corrosion-resistant chrome-plated finish.

### Non-slip surface.

The STAHLWILLE spanners have a high-quality surface structure with a good grip, which even allows you to work safely and securely with oily hands. The non-slip property increases handling control.

### Organised storage.

The set can be stored in the compartments of a practical roll-up tool pouch. This makes it convenient and compact enough to carry anywhere. Transparent mesh inserts provide a quick view of the contents of your tool set.

## Technologies and features.

### Double-T profile

Our combination and ring spanners have an additional recess in the middle of the tool. Similar to the principle of a double T-beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

### Offset Shaft Design

Our spanners are specially designed with additional reinforcement in the load zones where the greatest amount of force is transmitted - namely where the jaw meets the shank - in order to prevent deformation.
