

Combination spanner OPEN BOX, metric

OPEN BOX 16

Product no. **40093232**
GTIN **4018754019083**
Model **OPEN BOX 16 3,2**

Label. Combination spanner OPEN BOX long Spanner size 3.2 mm L.75mm

- Features.**
- ISO 3318
 - Chrome Alloy Steel, chrome plated

Advantages.

High-quality combination spanner set Combination spanner OPEN BOX, metric , jaw side 15 ° angled, length 75 mm, ISO 3318, , 40093232.

The double-T profile gives the spanner outstanding bending strength.

Special manufacturing process makes thin-walled rings possible – perfect for screwdriving in places that are difficult to access.

The distinctive STAHLWILLE rounded finish gives the spanner a non-slip and pleasant feel for safe working, even with oil-smearred hands.

Product highlights.

Optimum power transmission.

Every spanner guarantees consistently excellent quality due to minimal manufacturing tolerances and highly reproducible precision. The jaws and ring always sit firmly on the screw, thus ensuring optimal power transmission.

Non-slip surface

STAHLWILLE spanners have a high-quality surface finish with good grip, making it possible to work safely and efficiently, even with greasy hands. The non-slip property improves control during handling.

A solution for every situation.

Our combination spanners are available in different versions (metric, imperial, long, with Spline-Drive profile) and as sets in textile bags, roll-up tool pouches or TCS inserts.

Excellent workmanship.

The spanner is made from high-quality forged Chrome Alloy Steel, making it extremely robust and durable, even during continuous use. It also has a corrosion-resistant chrome-plated finish.

Technologies and features.

Double-T profile

Our combination and ring spanners have an additional recess in the middle of the tool. Similar to the principle of a double T-beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

Thin-walled rings

The thin wall diameter of our rings makes it easier to work in confined spaces. The ring sides are taller than standard nuts, which prevents jamming.

Offset Shaft Design

Our spanners are specially designed with additional reinforcement in the load zones where the greatest amount of force is transmitted - namely where the jaw meets the shank - in order to prevent deformation.
