

## Combination spanner, inch

130a

Product no. **40572020**  
GTIN **4018754020645**  
Model **130a 5/16**

**Label.** Combination spanner Spanner size 5/16 " L.115mm

**Features.**

- Fed. Spec. GGG-W-636 E
- HPQ® heavy-duty steel, chrome-plated

## Advantages.

Made in Germany – STAHLWILLE Combination spanner, inch, open end 15 °angled, length 115 mm, Fed. Spec. GGG-W-636 E, , 40572020

The double-T profile gives the spanner outstanding bending strength.

Special manufacturing process makes thin-walled rings possible – perfect for screwdriving in places that are difficult to access.

The distinctive STAHLWILLE rounded finish gives the spanner a non-slip and pleasant feel for safe working, even with oil-smearred hands.

## Product highlights.

### A solution for every situation.

Our combination spanners are available in different versions (metric, imperial, long, with Spline-Drive profile) and as sets in textile bags, roll-up tool pouches or TCS inserts.

## Technologies and features.

### High Performance Quality (HPQ®)

Our HPQ® tool is made of wear-resistant high-performance steel, yet is thin-walled and lightweight. It withstands high torques and is ideal for work in confined spaces such as turbines.

### Anti-Slip-Drive

The special AS-Drive profile makes high force transmission to the flats of screws and bolts possible without damaging them. This also prevents stripping of the screw head.

### Double-T profile

Our combination and ring spanners have an additional recess in the middle of the tool. Similar to the principle of a double T-beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

### Thin-walled rings

The thin wall diameter of our rings makes it easier to work in confined spaces. The ring sides are taller than standard nuts, which prevents jamming.

### Offset Shaft Design

Our spanners are specially designed with additional reinforcement in the load zones where the greatest amount of force is transmitted - namely where the jaw meets the shank - in order to prevent deformation.
