Advantages.

Reduced blade diameter: for reaching and actuating low-lying screw connections or screws, e.g. in switch cabinets/switchgear.

Roll-off protection on the handle prevents unwanted rolling away from the workplace.

Flush with the tip of the blade thanks to integrated protective insulation: saves valuable space and allows optimum access even in the tightest installation spaces.

With the Tool Control System, the tools lie in chemical-resistant safety foam inserts with high-precision, three-dimensional cut-outs.

Technologies and features.

VDE DRALL+

Our VDE-DRALL+ handle is insulated to 1.000 V according to DIN EN 60900. It is non-slip and ergonomically shaped. An extended grip zone protects the fingers and a hand stop prevents the tool from accidentally slipping or rolling away.

Tool Control System

The intelligent modular insert system protects and organises the tools in tool boxes, workshop trolleys and workshop benches. Two-colour foam inlays make checking the completeness of the tools quick and easy.
