QuickRelease secures every single link in the tool chain - from ratchet to extension to socket insert.

Easily accessible and ergonomically optimised mechanism secures the tool without taking up extra space.

Patented, DIN 3123/ISO 3316.

Other locking systems on the market only fix the first insertion tool on the ratchet.

More efficiency. Tool changing is not only safe, but also quicker to perform.

QuickRelease

The QuickRelease safety lock prevents unintentional loss of insert tools. These click securely into place and are only released again at the push of a button for a quick tool change.
