Advantages.

High-quality combination ratcheting spanner set with inch spanner sizes.

The ring side has an angled design with double hexagon, the jaw position of 15° makes it possible to work even in hard-to-reach places.

The practical roll-up pouch is a neat storage solution for tool cases and tool boxes.

The ratchet with 72 teeth allows a working angle of only 5° - for efficient working even in the tightest spaces.

The distinctive STAHLWILLE round finish gives the ratchet ring spanner a non-slip and pleasant feel for safe working, even with oil-smearred hands.

Product highlights.

Non-slip surface.

The STAHLWILLE spanners have a high-quality surface structure with a good grip, which even allows you to work safely and securely with oily hands. The non-slip property increases handling control.

Excellent workmanship.

Our spanners are made from high-quality forged chrome alloy steel, giving them outstanding robustness and durability, even in continuous and prolonged use. They also have a corrosion-resistant chrome-plated finish.

Organised storage.

The set can be stored in the compartments of a practical roll-up pouch. This makes it convenient and compact enough to carry anywhere. Transparent mesh inserts provide a quick view of the contents of your tool set.

Technologies and features.

Double T-profile

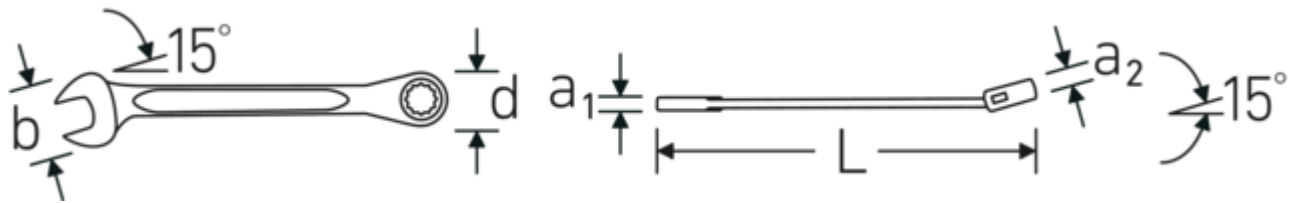

Our combination and ring spanners have an additional recess in the middle of the tool. Similar to the principle of a double T-beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

Offset Shaft Design

Our spanners are specially designed with additional reinforcement in the load zones where the greatest amount of force is transmitted - namely where the jaw meets the shank - in order to prevent deformation.
