#### Label.

Combination ratcheting wrench Wrench size 3/4 " L.252mm

## Product highlights.

#### Integrated ratchet.

Our combination ratcheting wrenches have an integrated fine-tooth ratchet. There is no need to change your grip or apply the tool several times. The bolt can be tightened quickly and efficiently without stopping, as with a ratchet.

#### Excellent workmanship.

The wrench is made from high-quality forged chrome alloy steel, giving it excellent robustness and durability, even in continuous use. It also has a corrosion-resistant chrome-plated finish.

#### Non-slip surface.

The STAHLWILLE wrenches have a high-quality surface structure with a good grip, making it possible to work safely and securely, even with greasy hands. The non-slip property increases handling control.

#### For all cases.

Our combination ratcheting wrenches are available in different versions (metric, imperial, angled, flat) and as sets in roll-up cases or TCS inserts.

## Technologies and features.

### Double T-profile

Our combination and ring wrenches have an additional recess in the middle of the tool. Similar to the principle of a double T-beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

### Offset Shaft Design

STAHLWILLE wrenches are reinforced between the jaw and shaft, as this is where the greatest forces are exerted. The special design strengthens the stress zones, thus reducing the risk of breakage to a minimum.
