

Ratchet ring spanners i.TCS inlay

OPEN RATCH TCS WT 17/12

Product no. **96830128**
GTIN **4018754248834**
Model **OPEN RATCH TCS WT 17/12**

Label.

Ratchet ring spanners i.TCS inlay OPEN RATCH TCS WT 17/12 8-19 12 pcs.

Features.

- For the drawers of the tool trolley no. 13217
- 460 x 250 x 30 mm
- 12-pieces

Advantages.

With the Tool Control System, the tools fit into chemical-resistant safety foam inserts with high-precision, 3-D cutouts

The practical safety insert system is an intelligent storage solution for tool trolleys and workshop trolleys.

The 72-tooth ratchet allows a working angle of only 5° - for efficient work even in the tightest spaces.

The ring side has a flat design with double hexagon and a jaw position of 15° for working even in hard-to-reach places.

The distinctive STAHLWILLE round finish gives the ratchet ring open-end spanner a non-slip and pleasant feel for safe working, even with oil-smearred hands.

Product highlights.

Field-tested configuration.

The STAHLWILLE spanners have a high-quality surface structure with a good grip, which even allows you to work safely and securely with oily hands. The non-slip property increases handling control.

Excellent workmanship.

Our spanners are made from high-quality forged chrome alloy steel, giving them outstanding robustness and durability, even in continuous and prolonged use. They also have a corrosion-resistant chrome-plated finish.

Non-slip surface.

The STAHLWILLE spanners have a high-quality surface structure with a good grip, which even allows you to work safely and securely with oily hands. The non-slip property increases handling control.

Technologies and features.

Double T-profile

Our combination and ring spanners have an additional recess in the middle of the tool. Similar to the principle of a double T-beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

Offset Shaft Design

Our spanners are specially designed with additional reinforcement in the load zones where the greatest amount of force is transmitted - namely where the jaw meets the shank - in order to prevent deformation.

Tool Control System

The intelligent modular insert system protects and organises the tools in tool boxes, workshop trolleys and workshop benches. Two-colour foam inlays make checking the completeness of the tools quick and easy.
