Product highlights.

Non-slip surface.

The STAHLWILLE wrenches have a high-quality surface structure with a good grip, making it possible to work safely and securely, even with greasy hands. The non-slip property increases handling control.

Excellent workmanship.

The wrench is made from high-quality forged chrome alloy steel, giving it excellent robustness and durability, even in continuous use. It also has a corrosion-resistant chrome-plated finish.

Technologies and features.

Double T-profile

Our combination and ring wrenches have an additional recess in the middle of the tool. Similar to the principle of a double T-beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

Offset Shaft Design

STAHLWILLE wrenches are reinforced between the jaw and shaft, as this is where the greatest forces are exerted. The special design strengthens the stress zones, thus reducing the risk of breakage to a minimum.

Tool Control System

The intelligent modular insert system protects and organizes the tools in tool boxes, workshop trolleys and workshop benches. Two-color foam inlays make checking the completeness of the tools quick and easy.
