Model **OPEN BOX 14/11**

#### Label.

Combination spanner set OPEN BOX 14/11 8-22 11 pcs.

#### Properties.

- **metric, identical** end sizes
- long design for higher power transmission
- ring-end cranked 10°, jaw angled 15°
- reinforcement between jaw and shaft
- durable, slim and lightweight design
- extremely resilient and durable
- high flexural strength due to double-T profile
- STAHLWILLE's rounded finish ensures a non-slip, pleasant feel
- drop-forged, hardened, and cooled in an oil bath
- Chrome Alloy Steel, chrome-plated
- DIN 3113 Form B/ISO 7738 Form B
- in robust polyester roll-up tool pouch with Velcro closure
- mesh inserts allow visibility of the tools
- a compact storage solution to keep your tools safe

## Benefits.

Made in Germany - Combination spanner set, 11 pcs., 8-22 mm, ring side angled 15°, DIN 3113 Form B / ISO 7738 Form B, Chrome Alloy Steel.

Special manufacturing process makes thin-walled rings possible - perfect for working in places that are difficult to access.

The practical roll-up tool pouch provides a well-organised storage solution.

The long force loading point requires less effort with constant torque.

The AS-Drive profile prevents damage to the fastener caused by force being applied to the edges of the nut or bolt.

### Non-slip surface

STAHLWILLE spanners have a high-quality surface finish with good grip, making it possible to work safely and efficiently, even with greasy hands. The non-slip property improves control during handling.

### A solution for every situation.

Our combination spanners are available in different versions (metric, imperial, long, with Spline-Drive profile) and as sets in textile bags, roll-up tool pouches or TCS inlays.

### Organised storage.

The set is stored in the pockets of a practical roll-up tool pouch. This makes it convenient and space-saving to carry around. Transparent mesh inserts allow you to see at a glance whether your tools are complete.

## Technologies and features.

### Double-T profile

Our ring, open-ended and combination spanners have an additional recess in the middle of the tool. Similar to the principle of a double-T beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

### Thin-walled rings

The thin-walled diameter of our rings makes it easier to work in confined spaces. The ring wall is deeper than standard nuts, which prevents jamming.

### Offset Shaft Design

Our spanners are specially designed with additional reinforcement in the load zones where the greatest amount of force is transmitted - namely where the jaw meets the shank - in order to prevent deformation.
