Benefits.

Reversible STAHLWILLE 1/4" fine-tooth ratchet with QR push button release.

Patented QuickRelease locking system secures every component from ratchet and the joint to the socket without loss of space.

The high-quality Chrome Alloy Steel construction promises a long service life.

80 teeth allow a practical working angle of just 4.5° - for even power transmission and precise use in the tightest spaces.

Ratchet head swivels 90°, lockable in 4 positions (0°; 30°/60° up; 30° down) - for hard-to-reach places.

Product highlights.

Simple and reliable switching function.

The recessed switch lever makes it easy to change directions, even with one hand.

For hard-to-reach work areas.

Our reversible ratchet with long force loading point is ideal for working on hard-to-reach screw points. It enables better power transmission when tightening screws.

Ideal for continuous use.

The ratchet is forged from high-quality Chrome Alloy Steel and additionally chrome-plated, which gives it high stability and resistance even in continuous use. It is designed for precise and safe continuous use in automotive or commercial vehicle workshops, assembly and industry.

Technologies and features.

QuickRelease

The QuickRelease safety lock prevents unintentional loss of insert tools. These click securely into place, and are only released again at the push of a button for a quick tool change. In transducers: The QuickRelease safety lock helps you to quickly mount and change transducers. The transducers lock into the calibration system and only unlock again at the push of the buttons.

Foreign Object Damage

STAHLWILLE protects against FOD (Foreign Object Damage). Our tool is ideal for safety-relevant sectors such as aviation, thanks to the screwless design.

Fine-tooth ratchet mechanism

Our fine-tooth ratchets with 80 teeth re-engage after just 4.5° for maximum precision in confined spaces. 8 pairs of parallel teeth simultaneously ensure maximum load-bearing capacity and particularly smooth running, even at high torques.

2-component handle

Our 2-component handle is non-slip and ergonomically designed. It is resistant to the most common oils, greases, fuels, brake fluids, and Skydrol.
