Customized complete solution.

Our extensive product range contains high-quality tools for repairing and maintaining tractors, commercial, agricultural and construction vehicles. Among other things, it includes ratchets in all drive sizes, sockets up to 36 mm, various screwdrivers, large hammers, a wide range of bit sets, electronic calipers, numerous pairs of pliers, torches, drift punches, magnet lifters and much more. This equipment gives you a solid basis for maintaining engines, gearboxes, hydraulics, bodywork, and electronics.

Large versions.

This special range of products contains tools for particularly high force transmission for bolted joints on large components: The extra-long combination wrenches provide optimum leverage for additional force. The sockets in sizes of up to 36 mm are ideally suitable for tightening or loosening large screws, nuts and bolts on tractors and agricultural machinery.

Mobile workstation.

The 7 full-extension drawers are pre-equipped with STAHLWILLE tools in safety foam inserts. A separate, lockable cabinet section with height-adjustable shelf provides additional storage space. The spacious 115 cm long work surface allows you to examine large components. Organized cable routing increases your safety in the workplace. With a working height of 104 cm and four smooth-running wheels, you have the ideal conditions for ergonomic and mobile working, both in and outside the workshop.

Technologies and features.

Tool Control System

The intelligent modular inlay system protects and organizes the tools in tool boxes, tool trolleys and workbenches. Two-color foam inlays make checking the completeness of the tools quick and easy.

Modular Inlay System

This flexible solution for tool storage makes it possible to customize your tool trolleys and workbenches with 1/6, 1/3, 2/3 or 3/3 foam inlays.

QuickRelease

The QuickRelease safety lock prevents unintentional loss of insert tools. These click securely into place, and are only released again at the push of a button for a quick tool change. In transducers: The QuickRelease safety lock helps you to quickly mount and change transducers. The transducers lock into the calibration system and only unlock again at the push of the buttons.
