## Product highlights.

### Outstanding craftsmanship.

The blades are made of exceptionally fine industrial-grade chrome alloy steel, through-hardened and anchored in the grip in such a way that they stay there.

### Robust.

Whether slotted or cross-head - the rough blade tips transfer even the greatest torques to the screws - precisely and safely.

## Technologies and features.

### 3-component handle

Our 3-component handle combines hard and soft components, which give it its optimized ergonomics, maximum power transmission, and increased safety during daily use.

### Impact cap

Our DRALL+ screwdriver is equipped with a metal impact cap for use in extreme conditions, enabling the screwdriver to be impacted with a mallet or hammer.

### Hex shank profile

Some of our DRALL+ screwdrivers have a hex shank profile at the base of the handle which can be used in conjunction with a wrench to apply more force when loosening tight bolts.

### DRALL+

Our DRALL+ handle is non-slip and ergonomic. An extended grip zone protects the fingers and a hand stop prevents the tool from accidentally slipping or rolling away.
