Benefits.

Reduced blade diameter for accessing and working on low-lying bolted joints, e.g. in control cabinets or switching devices

Integrated protective insulation ensures that the blade is flush with the blade tip: Saves valuable space and enables optimal access even in the tightest installation spaces.

Roll-off protection on the handle prevents injuries caused by unintentional slipping and also stops the tool rolling away.

With the Tool Control System, the tools fit into chemical-resistant safety foam inlays with high-precision, 3D cutouts.

Technologies and features.

VDE DRALL+

Our VDE-DRALL+ handle is insulated to 1.000 V according to DIN EN 60900. It is non-slip and ergonomically shaped. An extended grip zone protects the fingers and a hand stop prevents the tool from accidentally slipping or rolling away.

Tool Control System

The intelligent modular inlay system protects and organises the tools in tool boxes, tool trolleys and workbenches. Two-colour foam inlays make checking the completeness of the tools quick and easy.
