Product highlights.

Outstanding craftsmanship.

The blades are made of exceptionally fine industrial-grade chrome alloy steel, through-hardened and anchored in the grip in such a way that they stay there.

Robust.

Whether slotted or cross-head - the rough blade tips transfer even the greatest torques to the screws - precisely and safely.

Technologies and features.

3-component handle

Our 3-component handle combines hard, soft and special fibre-coated components, which give it its optimised ergonomics, maximum power transmission, and increased safety during daily use.

Hex shank profile

Some of our DRALL+ screwdrivers have a hex shank profile at the base of the handle which can be used in conjunction with a spanner to apply more force when loosening tight screws.
