Combination spanners i.TCS inlay

TCS OPEN BOX 13a/23 3/16-1 1/8

Product no. 96830885

GTIN 4018754196340

OPEN BOX TCS 13a/23 Model

Label. Combination spanners i.TCS inlay OPEN BOX TCS 13a/23 3/16-1.1/8 24 pcs.

Properties. • 530 x 350 x 35 mm

• 23-piece set

Benefits.

Made in Germany - Combination spanners i.TCS inlay in TCS inlay, 24 pcs., 3/16-1.1/8 mm, ring side 15° angled, DIN 3113 Form B, Chrome Alloy Steel.

Product highlights.

Non-slip surface

STAHLWILLE spanners have a high-quality surface finish with good grip, making it possible to work safely and efficiently, even with greasy hands. The non-slip property improves control during handling.

A solution for every situation.

Our combination spanners are available in different versions (metric, imperial, long, with Spline-Drive profile) and as sets in textile bags, roll-up tool pouches or TCS inlays.

Order and check.

The set is securely organised in a STAHLWILLE TCS foam inlays. These durable inlays are chemical-resistant and have precise recesses for each tool. The eye-catching yellow underside of the TCS inlays serves as a signal surface to enable quick checking of the set's completeness.

Technologies and features.

Tool Control System

The intelligent modular inlay system protects and organises the tools in tool boxes, tool trolleys and workbenches. Two-colour foam inlays make checking the completeness of the tools quick and easy.

Double-T profile

Our combination and ring spanners have an additional recess in the middle of the tool. Similar to the principle of a double-T beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

Thin-walled rings

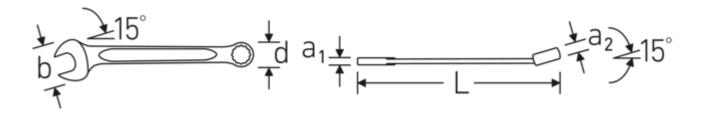

The thin wall diameter of our rings makes it easier to work in confined spaces. The ring sides are taller than standard nuts, which prevents jamming.

Offset Shaft Design

Our spanners are specially designed with additional reinforcement in the load zones where the greatest amount of force is transmitted - namely where the jaw meets the shank - in order to prevent deformation.
