## Product highlights.

**PRODUCT IMAGE  
IN PROGRESS**

### **Complete solution for industry.**

Our extensive range includes high-quality tools for a wide range of applications, such as vehicle maintenance, general repairs or assembly and disassembly work. It includes spanners with various sizes, sockets up to 32 mm, a large bit set, a wide selection of pliers and much more. With this equipment, you get a broad base for a wide range of applications in the automotive, electrical and mechanical engineering industries.

### **Takes on anything.**

High-quality materials such as the tightly welded stainless steel tray ensure the durability typical of STAHLWILLE and prevent liquids from penetrating the interior of the trolley. The 877 x 481 mm work surface is particularly suitable for working on large components. Thanks to its robust construction, the TTS 93 achieves a static load capacity of 500 kg. The drawers can be loaded with 30 kg thanks to reinforcements, and the bottom drawer can even be loaded with 45 kg.

### Full configuration as standard.

Whether paper roll and spray can holders, all-round impact protection with shock absorption, perforations on both sides for attaching accessories, locking brakes or oil and acid-resistant smooth-running castors (Ø 125 mm) with thread protection. Our tool trolley has many features - as standard.

## Technologies and features.

### Tool Control System

The intelligent modular inlay system protects and organises the tools in tool boxes, tool trolleys and workbenches. Two-colour foam inlays make checking the completeness of the tools quick and easy.

### QuickRelease

The QuickRelease safety lock prevents unintentional loss of insert tools. These click securely into place, and are only released again at the push of a button for a quick tool change.
