Benefits.

High quality double-ended ring spanner, deeply cranked, in metric spanner sizes.

The AS-Drive profile prevents damage to the fastener caused by force being applied to the edges of the nut or bolt.

Manufactured from durable Chrome Alloy Steel for a long service life and resistance to wear.

A special manufacturing process makes thin-walled rings possible - primarily for slightly lower-lying screw connections.

The distinctive STAHLWILLE rounded finish ensures the combination spanner is comfortable to hold and is easy to grip, ensuring safe working, even with oily hands.

Technologies and features.

Anti-Slip-Drive

The special AS-Drive profile makes high force transmission to the flats of screws and bolts possible without damaging them. This also prevents stripping of the screw head.

Thin-walled rings

The thin wall diameter of our rings makes it easier to work in confined spaces. The ring sides are taller than standard nuts, which prevents jamming.
