Complete solution for industry.

Our extensive range includes high-quality tools for a wide range of applications, such as vehicle maintenance, general repairs or assembly and disassembly work. It includes spanners with various sizes, sockets up to 32 mm, a large bit set, a wide selection of pliers and much more. With this equipment, you get a broad base for a wide range of applications in the automotive, electrical and mechanical engineering industries.

Takes on anything.

High-quality materials such as the tightly welded stainless steel tray provide the durability that is typical of STAHLWILLE, and prevent liquids from penetrating the interior of the trolley. The working area of 740 x 570 mm is particularly suitable for working on large components. Thanks to its robust design, the 98 PRO achieves a static load-bearing capacity of 1,400 kg. The drawers can be loaded with up to 40 kg thanks to stiffening, and the bottom drawer can even be loaded with up to 60 kg.

Full configuration as standard.

Whether paper roll and spray can holders, all-round impact protection with shock absorption, perforations on both sides for attaching accessories, locking brakes or oil and acid-resistant smooth-running castors (Ø 125 mm) with thread protection. Our tool trolley has many features - and they come as standard.

Technologies and features.

Modular Inlay System

This flexible solution for tool storage makes it possible to customise your tool trolleys and workbenches with 1/6, 1/3, 2/3 or 3/3 foam inserts.

Tool Control System

The intelligent modular inlay system protects and organises the tools in tool boxes, tool trolleys and workbenches. Two-colour foam inlays make checking the completeness of the tools quick and easy.

QuickRelease

The QuickRelease safety lock prevents unintentional loss of insert tools. These click securely into place, and are only released again at the push of a button for a quick tool change.
