

Separation assemblies

11500

Product no.	71050017
GTIN	4018754342235
Model	11500/2

Label.

Separation assembly

Properties.

- for pullers 11501/1-4
- for separating and removing ball bearings, roller bearings, bushings, wheels and other tightly fitting parts
- the puller pins of the puller are screwed into the separation assembly
- separator jaws slide under the component to be removed
- zinc plated

Benefits.

For use with puller 11501.

For quick separation and extraction of tight fitting parts such as gears, ball bearings and belt pulleys.

Sharp jaws make reliable detachment possible in areas where there is insufficient room for puller hooks.

The separating jaws are clamped by tightening the nuts on the side bolts evenly.

Protects sensitive components thanks to the smooth, even surface of the large contact areas.

Product highlights.

**PRODUCT IMAGE
IN PROGRESS**

Gentle separation and pulling.

The wedge-shaped contact surfaces have an even surface, which protects the sensitive components during the separation or pulling process.

Excellent quality.

STAHLWILLE is known for high-quality tools. The tool is carefully constructed, made of robust steel and galvanised for high durability and resistance to high loads.

For increased safety.

Thoughtfully designed, die-forged and precisely machined, hardened and tempered on state-of-the-art machines - the STAHLWILLE puller range offers numerous products for a wide range of applications. For example, terminal pullers, pullers for ball joints, counter stays or ball joint extractors - always in premium quality.
