*The advantages at a glance:

With our Tool Control System, the tools are arranged in chemical-resistant special foam inserts with sculpted three-dimensional cut-outs.

The signal colour is yellow. A glance is enough to see whether all tools are in their correct places: If you can see yellow, there is a tool missing.

Technologies and features.

Tool Control System

The intelligent modular inlay system protects and organises the tools in tool boxes, tool trolleys and workbenches. Two-colour foam inlays make checking the completeness of the tools quick and easy.

QuickRelease

The QuickRelease safety lock prevents unintentional loss of insert tools. These click securely into place, and are only released again at the push of a button for a quick tool change. In transducers: The QuickRelease safety lock helps you to quickly mount and change transducers. The transducers lock into the calibration system and only unlock again at the push of the buttons.
