Benefits.

Made in Germany - Combination spanner set, 17 pcs., 6-22 mm, ring side angled 15°, DIN 3113 Form B / ISO 7738 Form B, Chrome Alloy Steel.

Special manufacturing process makes thin-walled rings possible - perfect for working in places that are difficult to access.

The practical roll-up tool pouch provides a well-organised storage solution.

The long force loading point requires less effort with constant torque.

The AS-Drive profile prevents damage to the fastener caused by force being applied to the edges of the nut or bolt.

Non-slip surface

STAHLWILLE spanners have a high-quality surface finish with good grip, making it possible to work safely and efficiently, even with greasy hands. The non-slip property improves control during handling.

A solution for every situation.

Our combination spanners are available in different versions (metric, imperial, long, with Spline-Drive profile) and as sets in textile bags, roll-up tool pouches or TCS inlays.

Organised storage.

The set is stored in the pockets of a practical roll-up tool pouch. This makes it convenient and space-saving to carry around. Transparent mesh inserts allow you to see at a glance whether your tools are complete.

Technologies and features.

Double-T profile

Our ring, open-ended and combination spanners have an additional recess in the middle of the tool. Similar to the principle of a double-T beam, this provides a tremendous load capacity and maximum strength whilst reducing weight.

Thin-walled rings

The thin-walled diameter of our rings makes it easier to work in confined spaces. The ring wall is deeper than standard nuts, which prevents jamming.

Offset Shaft Design

Our spanners are specially designed with additional reinforcement in the load zones where the greatest amount of force is transmitted - namely where the jaw meets the shank - in order to prevent deformation.
